Profile

Third-year Computer Science student with a strong academic foundation, and a proactive approach to learning. Seeking an internship opportunity to apply theoretical knowledge in a real-world software development environment. Committed to contributing effectively to team objectives, gaining industry exposure, and developing practical skills through hands-on experience and professional collaboration.

Projects

1.StyloCode – Transform UI/UX Design into Code:

Developed a web-based tool that allows users to visually design web pages using a drag-and-drop interface and automatically generates the corresponding HTML, CSS, and animations. • Simplified front-end development by converting visual elements into clean, production-ready code. • Implemented dynamic layout recognition, responsive design features, and modern CSS animations, enabling rapid prototyping and design-to-code conversion.

2. CAR EXPO:

Developed a responsive website for showcasing cars in an expo environment, with detailed listings , specifications, images, and inquiry options. • Users can browse models, filter by brand/category, and access contact forms for bookings. • Created a clean UI design and seamless navigation for both desktop and mobile platforms.
